What is digital growth?

JAN
2022

DIGITAL GROWTH

CHANGE IN THE USE OF CONNECTED DEVICES AND SERVICES OVER TIME

TOTAL
POPULATION

+1.0%

YEAR-ON-YEAR CHANGE
+80 MILLION

UNIQUE MOBILE
PHONE USERS

+1.8%

YEAR-ON-YEAR CHANGE
+95 MILLION

INTERNET
USERS

+4.0%

YEAR-ON-YEAR CHANGE
+192 MILLION

ACTIVE SOCIAL
MEDIA USERS

+10.1%

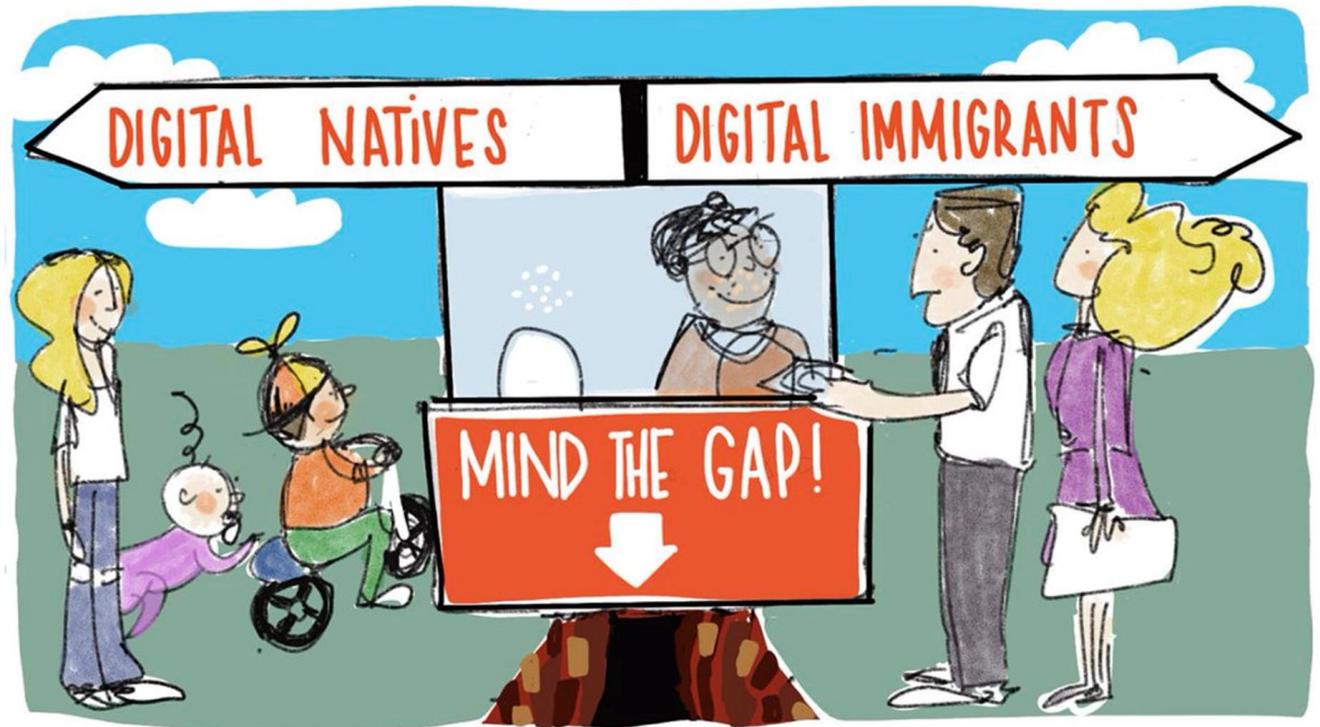

YEAR-ON-YEAR CHANGE
+424 MILLION

Impact

- increasing accessibility of digital devices and the internet
- more time in front of the screen
- less parental supervision
- growing online threats

Problem of digital natives,
digital immigrants by
Marc Prensky
(2001)

Threats in the 8-16 age group

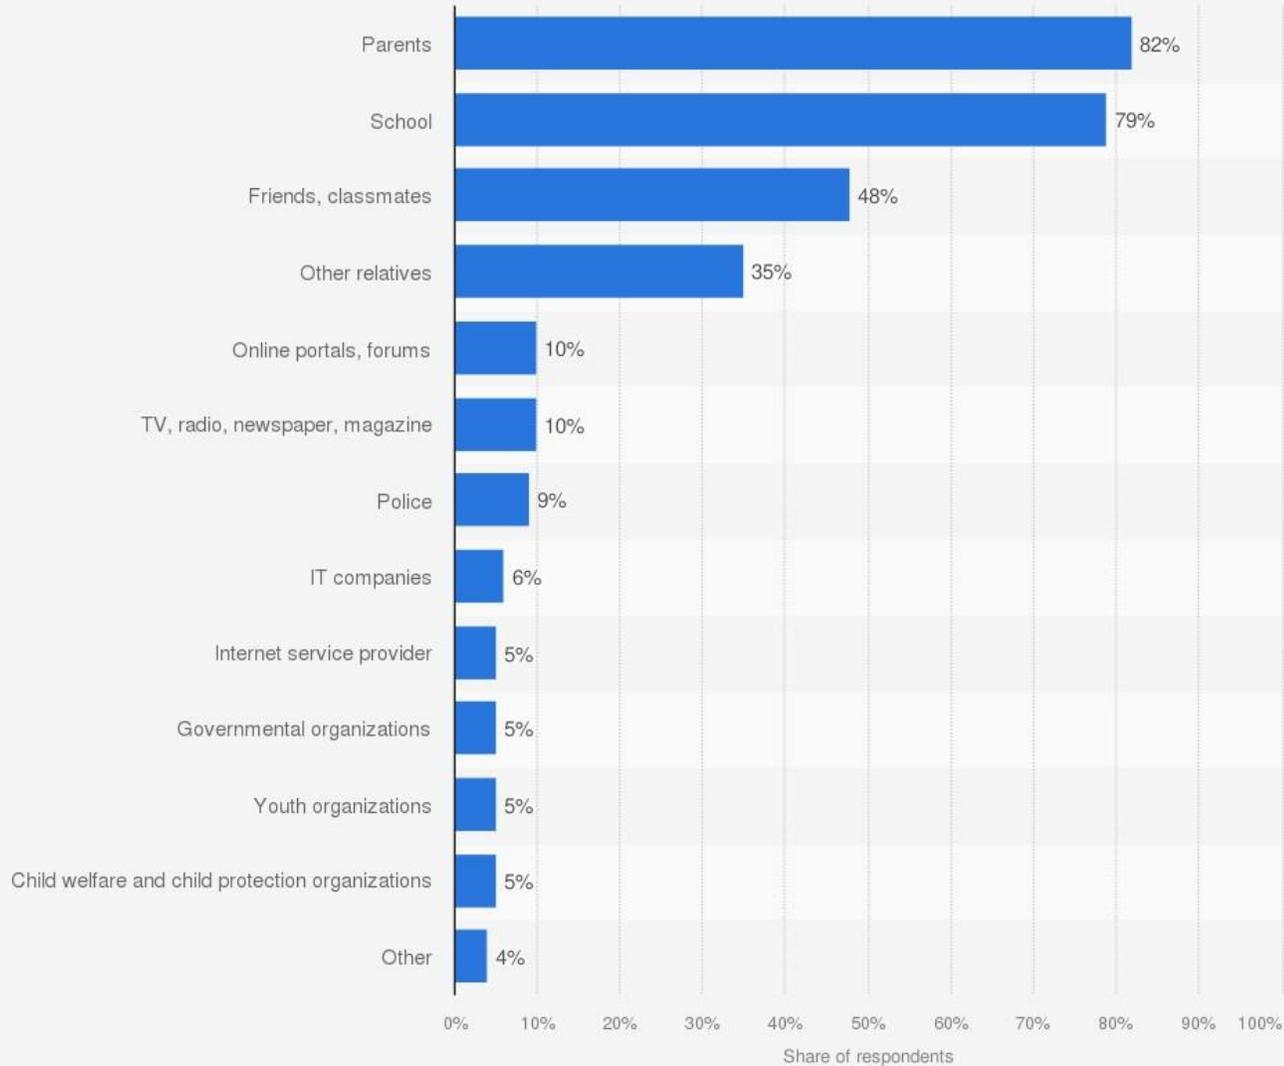

ÓBUDAI EGYETEM
NEUMANN JÁNOS INFORMATIKAI KAR

- inappropriate or dangerous content
- cyberbullying (suicide)
- online predators (online grooming)
- child sexual exploitation (CSE)
- phishing/data theft
- online-based shaming (sexting)
- concerns about children's privacy
- misinformation and radicalization
- potential for addiction
- mental or physical health problems (sleep deprivation, TMI – Too Much Information)

Poll on Hungarian children's sources of information on cyber security in 2020

AI-driven digital parenting

A possible solution?

Maybe!

- **Define objectives (bridging the awareness gap)**
- **User Research (target audience – both children and parents)**
- Choose AI technology (incorporating NLP, ML, adaptive learning, chatbots and personalization algorithms)
- Data collection plan (baseline assessments of participants' cybersecurity and awareness knowledge)
- Prototype development (with only basic functionalities)
- User testing (user experience, feedback, improving)
- Full platform development, implementation and continuous improvement
- Research the platform's usage (track engagement metrics)
- Effectiveness evaluation (post-assessment of cybersecurity)

Social benefit?
Safer
childhood?

Thank you for your attention!
